

Eye or vision disturbances

Abdominal pain or cramps

Reduction in foetal movements

Nausea, vomiting and other flu-like symptoms

Solving the puzzle of Premature Birth

Leaking fluid from vagina

You are worried, concerned or just don't 'feel right'

"It's probably nothing, but it might be something"

Regular contractions

Oedema swelling of hands or face

Backache or pelvic pressure

Yesterday 57 babies were born prematurely.
 Yesterday 57 families began the heartache of watching their baby struggle for life.
 Yesterday **more** babies were born prematurely than 10 years ago.
 The reason most of these babies are born early is still not known.

Without understanding the causes, there can be no cures.

With your support, we can solve the puzzle of premature birth, one piece at a time.

Solving the puzzle of
premature birth
